(54) FACSIMILE EQUIPMENT

(57)Abstract:

PURPOSE: To appropriately judge the situation of a device, and to improve an operability by checking the maximum width of a received original and that of a recording sheet, and communicating a necessary recording sheet size to an operator.

CONSTITUTION: The entire memory-received originals are stored in an SAF memory 2. A facsimile control part 5 checks the validity of the original output. The presence or absence, and sheet size of a recording sheet 7a under the monitor of a plotter part 7, and the sheet size of the original in the memory 2 are checked as check items. First of all, the control part 5 reads the maximum sheet size of the plotter part 7, and reads the maximum original size of the received original. Next, the both sheet sizes are compared, and when the page size of the received original is equal to or smaller than the recording sheet size, the normal output is started, and when it is larger, the maximum original size of the received original is communicated to an operation display part 4. The maximum original size is displayed at a liquid crystal at the display part 4, communicated to the operator, and the operator is allowed to know that the output is invalid due to the mismatching of the recording sheet size.

LEGAL STATUS

[Date of request for examination] 25.06.1999

[Date of sending the examiner's decision of rejection] 17.07.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
